

A roll-out and the first flight of ultralight all-metal aircraft KP-2U Sova was made at the airport Bechyně (LKBC) in the Czech Republic on Sunday 26th May 1996.

Yes, the history of light aircraft manufacturing in Jihlava started more than fifteen years ago. Although our aircraft carry a new name SKYLEADER at present, we are continuously relying on historically proven high quality and excellent flight characteristics. To-date you can find more than 215 SKYLEADER aircraft in 23 countries around the world.

We wish all our aircraft owners, both past and new ones, to enjoy the safety, prestige and emotion provided by our SKYLEADER aircraft in years to come!

Feel free to contact us anytime with your requirements.

Your SKYLEADER team
