Modernized UL/S-LSA airplane will be presented under new name SKYLEADER

Jihlava, 14th January 2008 – **The Company JIHLAVAN airplanes Ltd. – Czech manufacturer of the airplane KP-5 well known in the USA will with the cooperation of their official US distributor, Mr. Edwin Miller from Kappa Aircraft (PA), present modernised S-LSA airplane KP-5 under new name SKYLEADER on the occasion of U.S. Aviation Expo Sebring, Florida (USA). The airplane is certified as Special Light-Sport Aircraft and distributed in various alternations in many countries all over the world since 1997. SKYLEADER is especially intended for customers with above standard requests for long Cross-Country flights, Flight Schools and individual recreational-sport flying. Its privileges are high performance and safe flight characteristics, extremely roomy and comfortable cockpit and most accessible advanced electronics in its category.**

„Presenting modernised vision of KP-5 under new name SKYLEADER on local US market will bring completely new possibilities for its customers especially in area of Cross-Country flights. Seats were newly re-arranged directly side by side which thanks to the enormous inner size of cockpit with width of 46.5 inches (118 cm) offers excellent comfort, huge baggage compartments and safe all-round view for both pilots as well as for flight instructors.

The ‘Orange Spirit’ equipment version, as to be seen on Sebring expo, offers comfortable and luxury-sporty cushioned interior, various color possibilities for interior and exterior and adapted instrument panel with avionics from well known companies Dynon Avionics and Garmin.“ Said Mr. Miroslav BOUBELA, Export Sales Manager of the Czech manufacturer.

In long term aspect our customers appreciates qualities of the all metal construction, eminent reliability and above standard flight characteristics of the KP-5 types. Innovation of our product brings next qualities to be used in Flight School areas, which predeterminates the airplane SKYLEADER 200 UL or 500 LSA also for new pilot training and their potential preparation for the GA category airplanes or just simple pleasure from flight in great machine.“
