JHLAVAN Re-Launch KP-5 as Skyleader

- 1997 ULJS-LSA airplane Re-Launched

JHLAVAN airplanes Ltd. – Czech manufacturer of the KP-5, have announced the modernised S-LSA airplane KP-5 now re-named SKYLEADER, during the U.S. Aviation Expo Sebring, Florida (USA).

The airplane is certified as a Special Light-Sport Aircraft and has been distributed in various types throughout many countries of the world since 1997. SKYLEADER is especially intended for customers with above standard requests for long Cross-Country flights, Flight Schools and individual recreational-sport flying. Its advantages are - high performance and safe flight characteristics,

extremely roomy and comfortable cockpit and easily accessible advanced electronics in its category.

SKYLEADER seats were newly re-arranged directly side by side which thanks to the enormous inner size of cockpit with a width of 46.5 inches (118 cm) offers excellent comfort, huge baggage compartments and safe all-round view for both pilots as well as for flight instructors.

The 'Orange Spirit' equipment version, as seen at the Sebring Expo, offers comfortable and luxury-sporty cushioned interior, various colour possibilities for interior and exterior. Plus an adapted and modernized instrument panel with avionics from well known companies Dynon Avionics and Garmin.
